

Construction of upgrades and improvements to the sanitary gravity sewer by the South Branch Mill Creek (TM-1 Collection System Resiliency Improvements) in Willingboro Township, Burlington County, New Jersey, \$1,309,600 were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (Infrastructure Bank) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the Infrastructure Bank to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits, including enhanced water quality by preventing sewage leaks into South Branch Mill Creek, reduced public health risks from asbestos exposure and potential overflows, improved infrastructure reliability through easier maintenance access, and environmental protection by mitigating stream erosion and ecosystem damage for residents and businesses by the South Branch Mill Creek, in Willingboro Township, Burlington County, New Jersey.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
